PROFESSIONAL SUMMARY

PHP Laravel Developer with **2.5+ years of experience** in building scalable web applications, REST APIs, and e-commerce systems. Skilled in backend architecture, API integration, authentication systems, and performance optimization. Proven ability to deliver production-ready applications used by real users. Actively seeking backend opportunities in UAE and Saudi Arabia.

EXPERIENCE

Associate Developer

Lince Soft Solutions Pvt. Ltd., Hyderabad

Oct 2023 – Present

- Developed and maintained scalable backend systems using **Laravel, PHP, and MySQL**
- Built secure and efficient **REST APIs** for multiple client applications
- Improved system performance and reduced API response time by **30%+**
- Implemented **authentication, authorization (RBAC), and API security**
- Optimized database queries for better performance and scalability
- Delivered complete backend modules for projects like **Akira Pet Food** and **Central English School**
- Collaborated with frontend and QA teams for smooth deployment and production releases

Jan 2023 – Sep 2023

- Developed custom web applications and APIs for small business clients
 - Built e-commerce features including product management, cart, and checkout
 - Integrated payment gateways and third-party APIs
 - Managed deployment using cPanel and handled live production issues
-

KEY PROJECTS

BuyBazaar – Multi-Vendor E-commerce Platform (Laravel)

- Developed vendor dashboard, product management, and approval system
 - Built REST APIs for frontend integration
 - Handled real-time product and order operations
-

Ultras E-Commerce Platform (Full Stack)

- Developed complete e-commerce system including **product, cart, and checkout flow**
 - Integrated backend APIs with dynamic frontend
 - Designed scalable database structure
-

Akira Pet Food – Web Application

- Developed product catalog, admin workflows, and order management system
 - Optimized backend logic for faster performance
-

King Furniture – CMS Web Application

- Built admin panel for managing products (Add/Edit/Delete)
 - Developed backend CMS system for real-time content updates
-

TECHNICAL SKILLS

Languages: PHP, Java (Core Java), JavaScript, SQL

Frameworks: Laravel, REST API, MVC Architecture

Databases: MySQL, Firebase

Tools: Git, GitHub, Postman, cPanel

Core Skills:

- API Development & Integration
 - Authentication & Security
 - Payment Gateway Integration
 - Performance Optimization
 - Deployment & Debugging
-

ACHIEVEMENTS

- Delivered multiple production applications used by **thousands of users**
 - Improved API performance by **up to 40%** through optimization
 - Led backend development and architecture decisions in projects
 - Recognized for fast debugging and reliable delivery
-

EDUCATION

Master of Computer Applications (MCA)

IIMT College of Engineering, Greater Noida (2021–2023)

Bachelor of Science (B.Sc.)

Mirza Ghalib College, Magadh University (2017–2020)
